

**Optimized document processing:
No more time-consuming and costly
manual document capture**

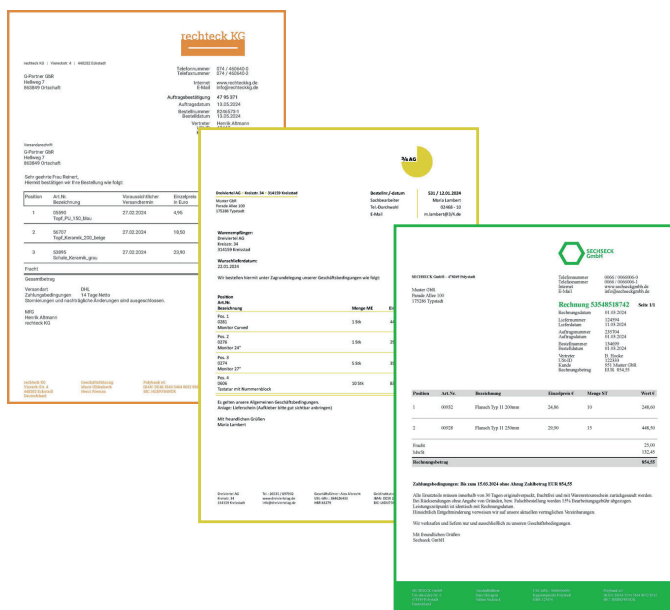

Our smart cloud-based AI-solution extracts data from incoming PDF documents in no time at all and processes it either in a controlled manner — i.e., by using your input to support the AI-learning process — or fully automatically, allowing you to focus on the issues that really matter and keep your business fit for the future.

INTELLIGENT DOCUMENT PROCESSING USING AI AND SEAMLESS SAP-INTEGRATION

- A powerful platform for all document types and document volumes
- Customized AI-fingerprint with private models to protect your sensitive data
- Central work cockpit with 360° view for efficient, location-independent working
- GDPR-compliant validation through expandable Masterdata-Check and -Enrichment
- Up to 98% time savings through automated document processing
- Intelligent, rapid error identification and handling through smart error handling

NO LIMITS ON EXTRACTION - ORDERS, ORDER CONFIRMATIONS, INVOICES...

With our pre-trained AI-models, we are able to respond quickly to specific requirements and select different layouts according to your needs. In addition to orders and invoices, individual document types such as delivery notes and test certificates can also be implemented.

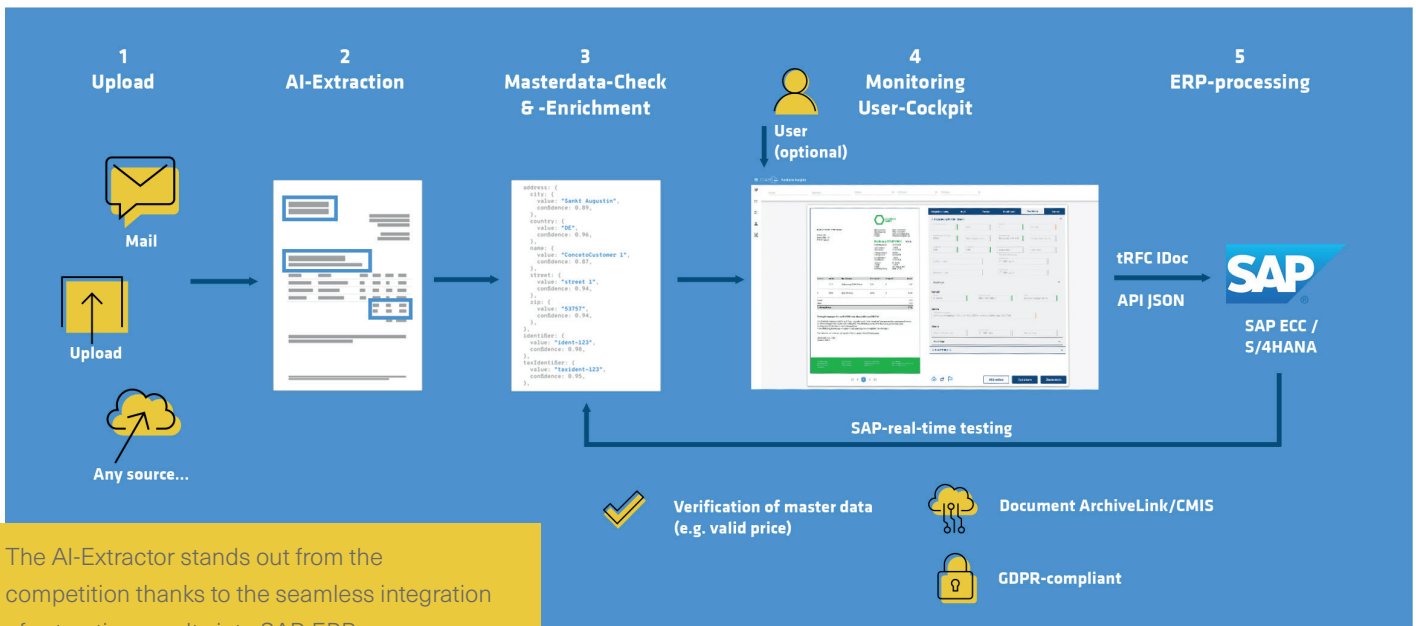

Have orders and invoices recorded automatically and avoid errors caused by manual entries. This not only saves you time during recording, but also eliminates the need for time-consuming corrections. Missing master data (e.g., customer numbers) is also read directly from your SAP-system and added.

Play it safe with incoming order confirmations too. The AI-Extractor extracts the data from the PDFs and checks in real time whether, for example, the confirmed items match the order or the delivery date tolerance is not exceeded.

After capturing all relevant data, the AI-Extractor forwards your invoices to your SAP-ERP for posting. No additional systems are required for forwarding.

OUR AI-PROCESS – PERFECTED RIGHT THROUGH TO THE SAP-SYSTEM

The AI-Extractor stands out from the competition thanks to the seamless integration of extraction results into SAP-ERP.

- The system receives incoming PDF-documents such as orders, order confirmations, delivery notifications, and invoices. In addition to manual upload or email, all common transfer options such as AS2, X.400, SFTP, etc. can be used.
- The software reads all booking-relevant data with AI-support and automatically compares it in real time with the master data stored in the ERP.
- The AI-Extractor displays the readout result to the relevant employee for checking and, if necessary, changing the determined values.

In case of discrepancies, the software marks the corresponding data fields with a clearly visible warning message.

- After verification/correction, the document can be made available to any ERP or downstream system.
- As an intelligent, AI-supported solution, the software learns with each document it processes and can, if desired, take over document processing completely automatically after a certain period of time.

7 GOOD REASONS TO CHOOSE OUR AI-EXTRACTOR

- **Immediate high-quality selection results** - The AI-Extractor is available immediately and easily after ordering.
- **Reach your goal with confidence** - Your personal contact person will help you with any questions and ensure that the AI gets off to a quick and successful start.
- **User-friendly operation** – Thanks to the intuitive user interface, employee training is unnecessary.
- **Highest level of data protection** – Our model architecture guarantees that your business data is strictly separated from the data of other customers.
- **Fast integration** – Our cloud solution is compatible with any ERP-system and downstream system.
- **Unlimited expandability** – Our AI-Extractor can reliably process all layouts and document types, even the most diverse ones.
- **SAP specialization** – Missing booking-relevant data is read and supplemented in SAP during the AI-analysis.

WITH THE AI-EXTRACTOR, YOU CAN SAY GOODBYE TO TIME-CONSUMING, ERROR-PRONE ROUTINE TASKS AND STAFF SHORTAGES.
